

BEWARE OF ALIENS

You're passionate about your aquarium & proud of your pond. They're bursting with life: colourful fish, decorative crustaceans, fascinating molluscs and beautiful plants. Did you know that some of them could become **invasive alien species**? If they were to end up in our rivers, lakes, creeks and oceans – they could seriously harm the balance of nature & damage the economy.

You can help protect our precious nature: don't release aquarium or pond species & responsibly dispose of unwanted plants & aquarium water. Nature thanks you!

Together for healthy nature
